

Currency Authenticator

Ultimate detection against counterfeit currency

ULTRASCAN provides the highest degree of reliability in the industry with a combination of custom designed sensors integrated into a single unit - capable of detecting even the most sophisticated counterfeit notes, including "Supernotes".

Ease of use

Ultrascan is simple to operate providing the user with a green light for genuine notes and a red light with a buzzer to identify suspect notes. Just insert a note and in less than a second you will have an answer.

State of the Art Detection Technology

Using state-of-the-art technology, the Ultrascan 2600 employs a combination of unique sensors to ensure extreme accuracy and reliability in detecting counterfeit currency.

Digital display

- Denomination of each note tested
- Quantity of authentic notes
- Total Dollar value of authentic notes

(Display function is for bills printed in 1996 and later)

Upgrades

The Ultrascan 26000 is easily upgradeable for future releases of U.S. Currency released by the Federal Reserve Bank.
