

Cut your waste hauling bills by 40-60% - GUARANTEED!

Gearing you up for profits

Pack-A-Drum® is the most advanced low tech trash deflator/compactor on the market today. This unique system reduces trash volume which decreases the number of trash pickups and/ or dumpster size.

The ability to reduce trash volume and provide free waste management consulting gives Pack-A-Drum the opportunity to guarantee users a 40-60% reduction in waste hauling costs.

Trash deflator

The heart of the Pack-A-Drum trash management system, provides an 8 to 1 force conversion ratio. Simply place the trash in the deflator, close the top and turn the wheel to realize your savings. The ease of use allows anyone to load and operate the unit.

Additional components

The platform cart provides easy movement for deflated trash and broken down cardboard from store to dumpster - the open design facilitates quick inspection to prevent theft.

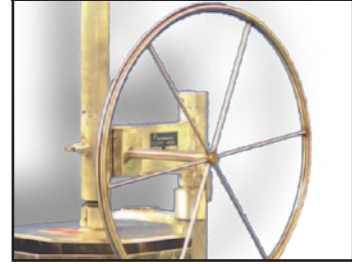

The trash container prevents leaks and improves sanitation and the handy cleaning caddy assists dining room cleaning.

Features & benefits
